## To Protect Ojai's Watershed

**MONDAY APRIL 6TH:  
THE NEXT ROUND OF GLYPHOSATE WILL BE SPRAYED  
ALONG OUR WATERSHED !**

RE: Continuing Arundo Erradication Program  
Ventura County Water "Protection" District has contracted a private company to spray Aquamaster, a glyphosate herbicide

- **Studies of glyphosate contamination of water are limited, but new results indicate that it can commonly contaminate streams in both agricultural and urban areas.**
- Exposure to glyphosate herbicides has caused genetic damage in laboratory tests, and use of glyphosate by farmers is associated with an increased incidence of lymphoma.
